#### ***Information Disclosure Statement***

Receipt is acknowledged of the Information Disclosure Statement filed February 5, 2004. The cited documents have been considered.

#### ***Specification***

The disclosure is objected to because of the following informalities:

In line 16 of page 1, "synchronizes" should be – synchronizers --.

The reference to a specific claim number (line 25 of page 1) is objected to because the claims can be amended, renumbered, or canceled during prosecution, rendering meaningless the reference thereto.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by

Nellums('437). Nellums discloses a synchronizer including a hub 32, first and second jaw teeth 28,30, a shift sleeve 34, first and second friction surfaces 24,26, first and second blocker surfaces 44,46, pre-energizing means 52, first and second self-energizing surfaces 70a,70b separated by non-self-energizing surfaces 70c, third and fourth self-energizing surfaces 72a,72b separated by non-self-energizing surfaces 72c, a member 63 mounted on the shift sleeve, and detent means 62. The hub includes an

annular flange defining external splines 38 and has a radial bore receiving resilient means 58 for biasing the follower 62 into engagement with a detent in the sleeve. The detent is formed at 63a in a radially inward facing surface of the internal splines 36.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jackson(US 2003/0006116 A1), Braun('727), and Braun et al.('516) show similar synchronizers.
